Warning and Disclaimer

The information presented herein is believed by TETRA Technologies, Inc. to be accurate. However, no representations are made concerning this information to any user and none shall be implied. Under no circumstances shall TETRA Technologies, Inc. or its responsible personnel be liable for any damages, including without limitation any special, incidental, or consequential damages, which may be claimed to have resulted from the use of any information contained herein.

Contributors

The following team members participated in the creation of this guide and we want to acknowledge their contributions and thank them for their efforts.

Chris Atkinson	Dennis L. Howe	Michael Shaw
Charlie Barton	Don Kehlenbeck	Larry Sims
Thomas S. Carter	Kurt Landry	Roosevelt Smith
Joey Detiveaux	Jeffrey McKennis	Edward D. Stegall
Weyman Dunaway	Suren Mishra	Mike Stephens
Russell Fisher	Aaron Morse	Stephen W. Stroh
Judy Franklin	Joe Murphey	Duane Sutherland
Joe Free	David Odum	Rosa Swartwout
Cheryl Frey	Wayne Peddy	Ray Talabi
Judy Guy-Caffey	Richard Perkins	Ric Termine
Steve Hardwick	Hank Reeves	Don Walters
Allen Hayes, Jr.	Rob Richie	Loren E. Worley
Bernard Hester	Ashley Saltzer	

Production Editor: Stephanie Wiegand

Technical Editor: Russell Fisher, Strategic Market Management

Contents

CHAPTER 1 Introduction

Why We Wrote this Guide	2
Use of Icons	2
Contact Information	3

CHAPTER 2 Fluid Planning: Fluid Selection

Safety and the Environment	5
The Planning Process	8
Design Rationale	8
Planning for Wells Requiring Corrosion Resistant Alloys	9
Fluid Categories	10
Fluid Density	11
General Fluid Density Ranges	14
Density Ranges	15
Crystallization Temperature	15
Temperature Considerations	16
Seasonal Effects and Brine Selection	17
Pressure Considerations—Pressurized Crystallization Temperature	17
Temperature and Pressure Effects	18
Estimating Required Fluid Volume	22
Calculating Volume Requirements	22
Permeability and Pressure Conditions in a Producing Zone	26
Distance to the Supply Point	27
Volume Calculation Worksheet	27
Fluid Compatibility	28
Mineralogy	28
Reservoir Fluid Chemistry	28
Metallurgy and Elastomers	28
Specialty Formulated Brines and Engineered Fluid Systems	29
Reasons to Consider a Specialty Fluid	29

CHAPTER 3 Fluid Planning: Processes and Systems

Maintenance of Clear Brine Fluid Properties	35
Corrosion Control	40
Displacement	46
Fluid Loss Control	50
Filtration and Brine Clarity	53

CHAPTER 4 Field Applications and Brine Maintenance

General Density Equations	59
Mixing Two Known Fluids—Unknown Final Density	60
Mixing Two Known Fluids—Known Final Density	61

Kill Weight Fluids	63
Weight Up of Working Fluid with Spike Fluid	63
Surface Density Correction	65
Brine Volume Calculations	67
Maximum Volume of a Specific Density	67
Weight Up of Single Salt Brine with Dry Chemicals	68
Weight Up Tables	69
Dry Salt Weight Up Volume Increase	70
Cutback Calculations	71
Cutback Tables	72
Mixing Viscosified Pills	74
Determining Product Type	75
Brine Type	75
TETRAVis L Plus Curves	78
Blending Equipment	88
Spotting Balanced Pills	88
Slug Calculations	91

CHAPTER 5 Product Quick Reference

Clear Brine Fluids	98
Single Salt Fluids	98
Multisalt Fluids	99
Stock, Custom, and Specialty Fluids	99
Fluids Specially Blended to Control Fluid Loss	100
Breaker Technology	101
Bridging Agents	101
Microfiber Bridging Agents	101
Calcium Carbonate Bridging Agents	102
Sized Salt Bridging Agents	102
Corrosion Control Additives	103
Dry Salt Weight Material	104
Formation Protection Additives	105
pH Control and Buffering Agents	106
Rheological and Filtrate Control Products	107
Filtration Products	109
Filtration Equipment	109
Filtration Consumables	110
Chemical Displacement Products	111
Specialized Rental Equipment	112
Specialty Wellbore Cleanup Tools	113

CHAPTER 6 Tables, Formulas, and Planning Support

Units of Measurement	119
Common Minerals and Metals	120
Useful Conversion Factors	121
Useful Formulas	124
Capacity Tables	129

Annular Velocity 144
 Single Salt Fluid Composition and Blending Tables 145

CHAPTER 7 U.S. Safety and Environmental Information

CBF Chemical Constituents 167
 Brine Handling and Personal Safety 168
 Handling of Clear Brine Fluids 169
 Safety Equipment 170
 Recommendations for Immediate Treatment 171
 Environmental Considerations: Brine Handling and Disposal 171
 Hazardous Substances 171
 Discharges 172
 Permitted Discharges 172
 Releases 173
 Reportable Quantities (RQs) 173
 Releases to the Environment and Notification Requirements 175
 Agency Contact Information 176

CHAPTER 8 Special Topics

Crystallization Temperature 181
 Formulation and Specification of Crystallization Temperature 183
 Pressurized Crystallization Temperature 184
 Corrosion Control 185
 Corrosion Overview 185
 Major Types of Corrosion 187
 Displacement 193
 Displacement Methods 194
 Chemical Displacement Systems 195
 Displacement Modeling Software 198
 Condition of Surface Equipment 198
 Predisplacement Condition of Mud 199
 Condition of Flowpath 199
 Pressure Differentials 200
 Factors Influencing Displacement Efficiency 200
 Reduction of Fluid Loss 203
 Fluid Loss Strategies 204
 Filtration 205
 Filtration Equipment Sizing 206
 Filtration Theory 209
 Brine Filtration 212
 Rig Practices and Filtration Performance 215
 Clarity 216
 Clarity Problems—Contaminants and the Formation of Solids 217
 Miscellaneous Contaminants 217
 Formation of Solids 219
 Conclusion 219

CHAPTER 9 References

References	223
